WORK EXPERIENCE

Sampath IT Solutions | Associate Software Engineer (Full Stack) **March 2024 - Present**
Java, Spring Boot, Angular, React, JavaScript, TypeScript, Oracle, HTML, CSS, GitHub

Trade Portal

- Led the development and enhancement of the Trade Portal system, a critical platform for the Sampath Bank Trade Department, streamlining Letter of Credit (LC) approval processes.
- Designed and implemented an MT700 document generation module, enabling seamless communication between Sampath Bank and international banks for trade transactions.
- Utilized Spring Boot and React to create a seamless and user-friendly interface for trade approvals

Credit Approval System

- Developed and maintained the Credit Approval System (CAS), a comprehensive platform managing loans, leases, and other credit-related activities within the bank.
- Engineered a robust approval workflow to enhance efficiency in credit decision-making.
- Developed a scalable and efficient system using Angular and Spring Boot to streamline credit-related operations, enhancing workflow automation and decision-making processes.

Invoisync - USA | Business/ Billing Analyst

Oct 2022 - March 2024

- Results-driven Business/Billing Analyst with expertise in optimizing billing processes, performing data analysis, and working with cross-functional teams to enhance efficiency. Skilled in translating business requirements into scalable solutions, automating workflows, and developing strategic billing plans to improve financial performance. Proficient in SQL, Power BI, and process optimization to drive informed decision-making

Legacy Health LLC - Colombo 03 | Operations - Executive

Sep 2021 - Oct 2022

- Managed operations by overseeing the execution of contracts with healthcare providers and ensuring provider networks were maintained according to company standards. Responsible for tracking payments, denials, and adjustments on patient accounts, while ensuring accurate documentation and researching insurance criteria for proper implementation.
